Employee data analysis is the process of collecting, analyzing, and interpreting data about employees to improve decision-making, enhance productivity, and create a better workplace environment.

WHO ARE THE END USERS?

Employees

Employers

Organization

Individual

Customers

OUR SOLUTION AND ITS VALUE PROPOSITION

Filtering -missing
Charts - visualize, report
Pivot table- summary
Conditional techniques-
identify

Dataset Description

Employee data set - kaggle

26 features

9 features

Employee id

Name - text

Rating- numerical

Performance - text

Gender - female, male

Business unit - text

Business type - text

THE "WOW" IN OUR SOLUTION

Employee data set - new or unique features is,

Calculating performance categories

Using formula for performance (high or low)

MODELLING

Data collection

Data cleaning

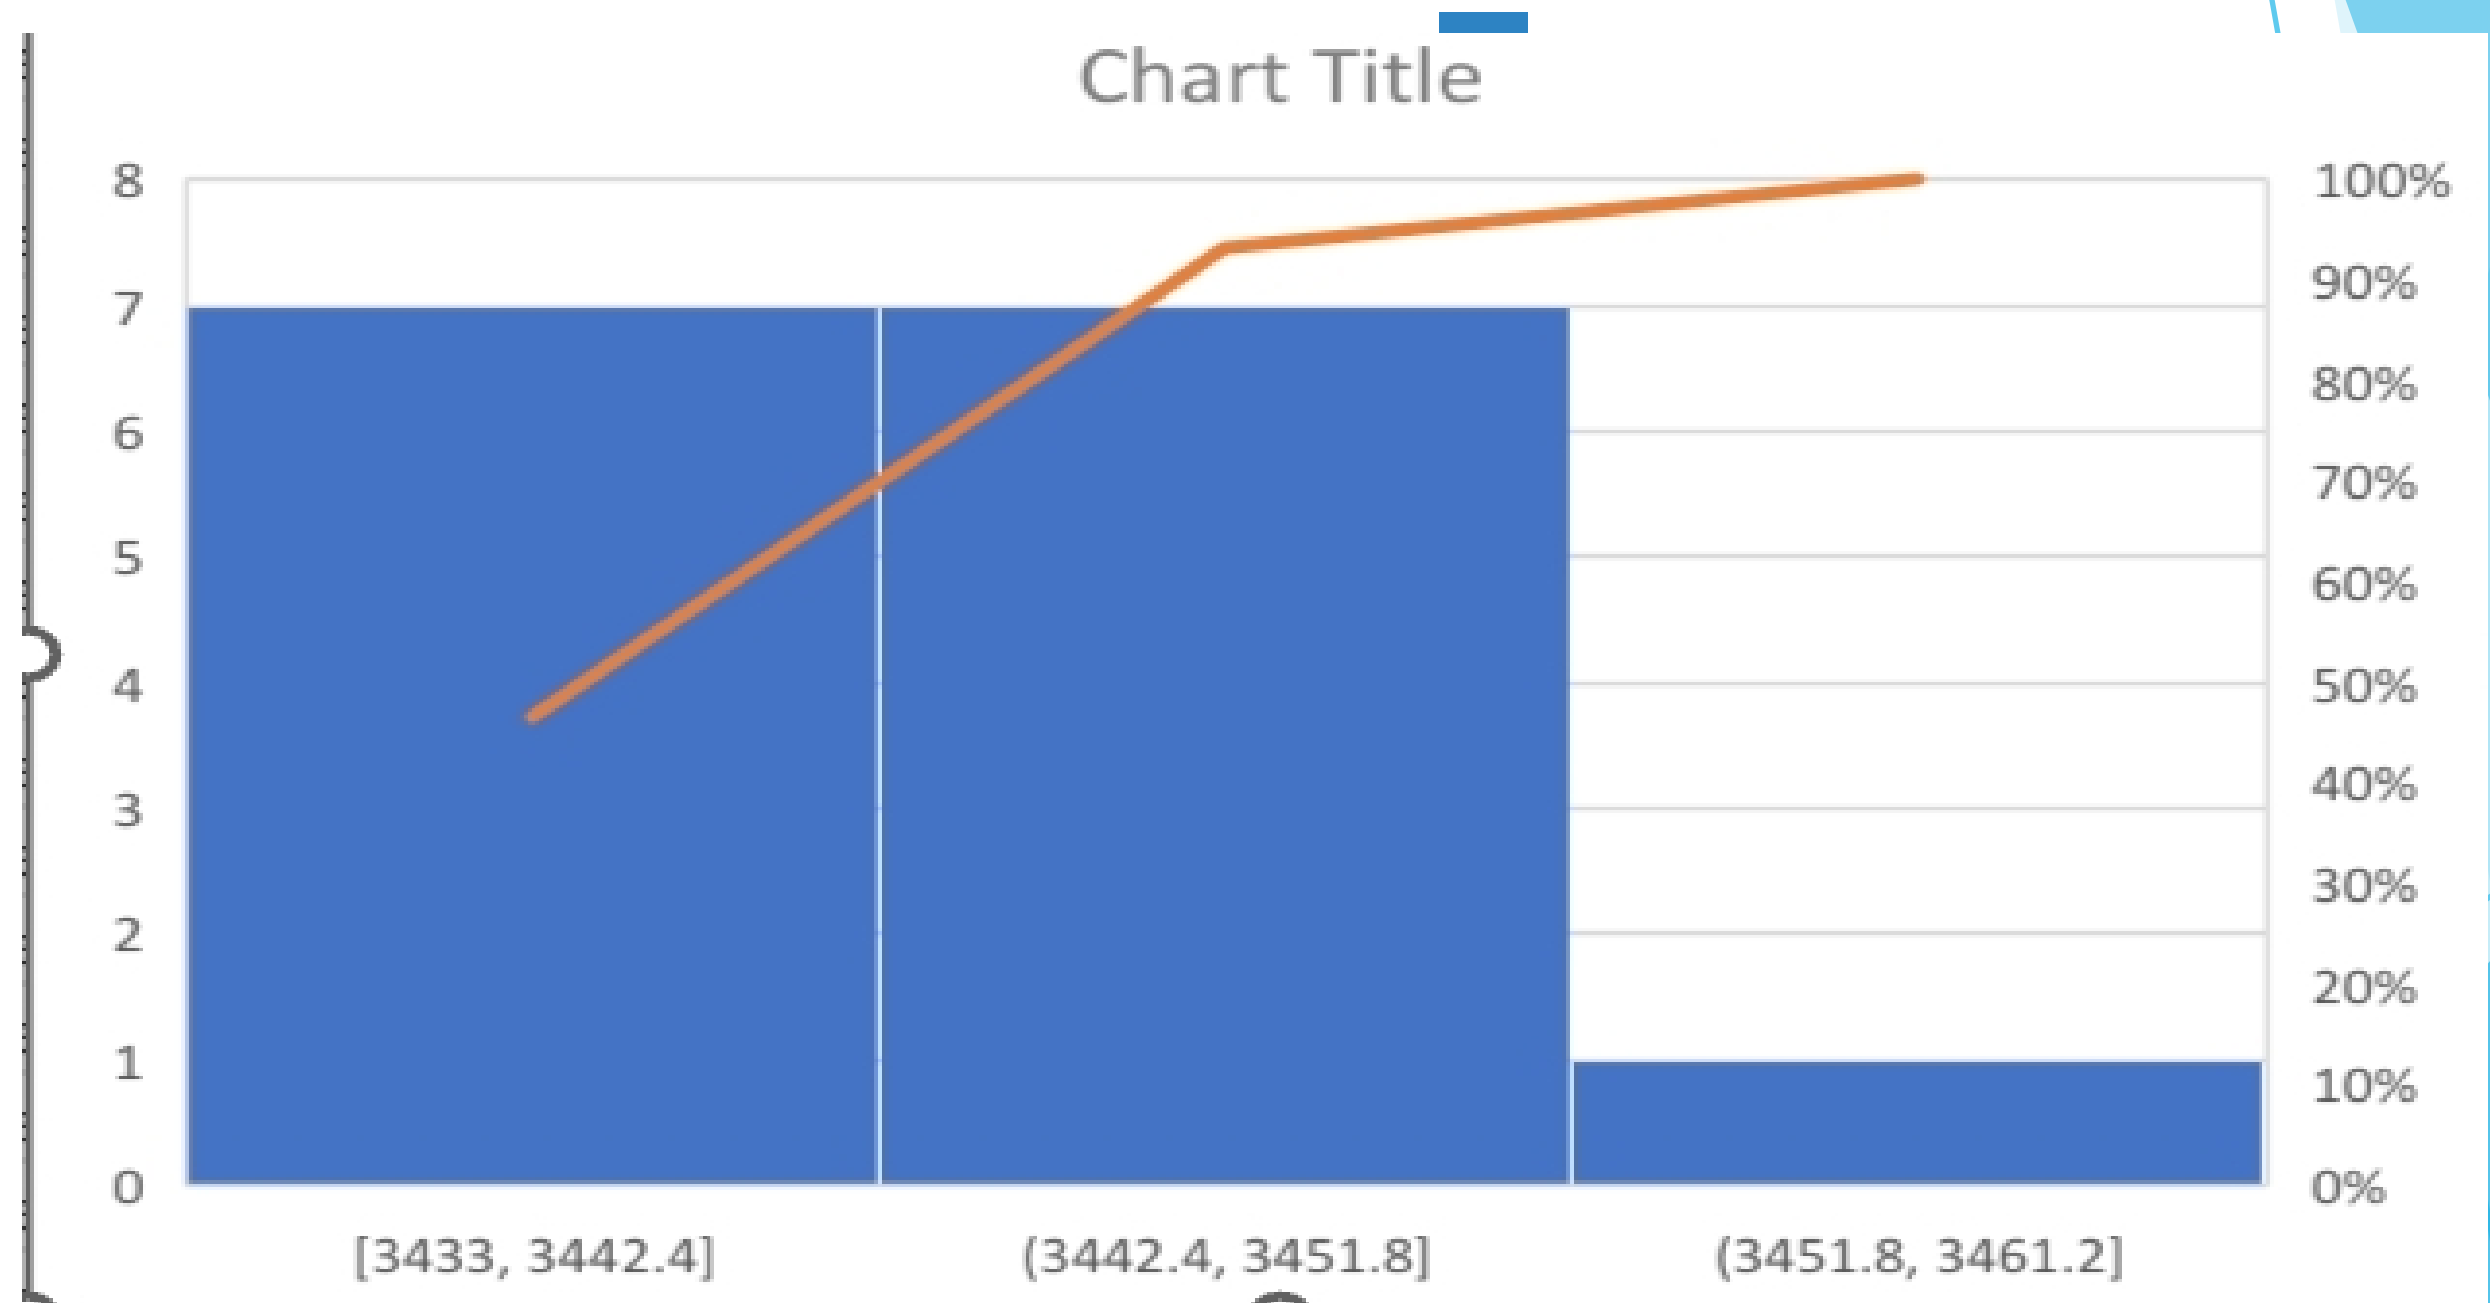

Data selecting

Performance formula (high or low)

Creating pivot table

Creating pivot chart

RESULTS

conclusion

These are the employee data set (performance level)
